

## **dataTaker Power Transformer Change as of 26-03-2013**

This document provides details of the change to a new switch mode power transformer for installation of ALL dataTaker products.

**This Change applies to all users.**

The transformer based power transformer is no longer available and has been replaced with an energy efficient switch mode power supply dataTaker Part Number PROMA-1000.

This global power supply has interchangeable input plug head, as shown below.

The power supply is MEPS and RoHS compliant, safety approvals UL/CUL/TUV/GS/SAA /CE/CB, safety compliant to UL 60950, EN 60950, AS NZS 60950 and IEC 60950.

**IMPORTANT:** When using the switch mode power supplies the dataTaker products must be Earthed / Grounded.

**Please Note:** General Safety Standards require that the logger is Earthed/Grounded.

An Earthing / Grounding point exists on all Loggers to meet these requirements.

Located on side panel as below – refer to Grounding section in product user manual.
